

Refer to figure 42.6 and 42.5 in your text book to help you complete this activity:

Label the following structures of the mammalian heart:

Right atrium

Left atrium

Right ventricle

Left ventricle

Semilunar valve (x 2)

Atrioventricular valve (x 2)

Aorta

Pulmonary artery

Which side of the heart holds deoxygenated blood?

Which side of the heart holds oxygenated blood?

Through which chamber/s does blood enter into the heart?

Through which chamber/s does blood leave the heart from?

When blood leaves the heart from the left side where does it go?

When blood leaves the heart from the right side where does it go?
